

/Dear guest

Novel coronavirus is transmitted through droplets from cough and sneeze or through physical contact such as handshake and hug.

Together, we reduce the risk of infection by following the given advice:

Wash your hands often
or use hand sanitiser
– always when you arrive
and before you leave.

Cough or sneeze
into your sleeve
– not into your hands.

Avoid handshakes
and hugs
as far as possible.

Touch as few things
as possible during your visit.
This applies tabletops,
door handles etc.

Keep your distance
to the people
around you.

If you on the day of our meeting have any symptoms of disease, please let us reschedule or arrange an online meeting instead.
